PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	<p>This topic is commonly seen. They are well known common side effects. But it is good to share with public to flag up because that is not uncommon mistake patients tend to do in the clinical practice. From my perspective, the author should come out with learning points that would be more useful for readers.</p> <p>Suitable – no need to change.</p> <p>No – case report is too short. Needs to elaborate more. Not mentioned about the outcome of the patient. What are the learning points in this case?</p> <p>It is fine but needs to improve more.</p> <p>Not ready to be published.</p> <p>Just amber!</p>	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Just ok	
Optional/General comments	The author reflects on his/her own article – rewrite case report and discussion parts with coming out with good learning points.
