

Editor's Comment:

Hope this message finds you well. Please accept this letter as a formal apology for delaying the reply. It is recommended that authors include expansions of 2-4D, GA3, and NAA in both the abstract and materials sections. Should these symbols be naphthaleneacetic acid, gibberellic acid, and 2-ethylhexyl 2,4-dichlorophenoxyacetate, respectively? The fact that 2-ethylhexyl 2,4-dichlorophenoxyacetate is chemically categorized as a herbicide, pesticide, and chlorophenoxy should also be mentioned. It might cause cancer in people. After that, the updated version is approved for publication.
