

Review Form 3

Journal Name:	Asian Journal of Research in Biochemistry
Manuscript Number:	Ms_AJRB_125378
Title of the Manuscript:	“Effect of media formulation on survival and growth performance of star jasmine (<i>Jasminum multiflorum</i> Burm. f. Andrews) propagation by stem cuttings”.
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript on the effect of propagation media on the growth performance of star jasmine is important for the scientific community because it provides insights into optimizing horticultural practices for this popular ornamental plant. By investigating how different media influence rooting, vegetative growth, and overall plant health, the study could help improve propagation efficiency and commercial production.	Yes, ok thank you.
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	No, I am changing it.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, but check the design of the experiment and include vegetative result	No, it is ok,
Are subsections and structure of the manuscript appropriate?	Yes	Yes
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Based on your description, if the experiment was conducted using polythene bags with different media, it likely falls under a Completely Randomized Design (CRD) rather than a Randomized Block Design (RBD).	No, I want to put as it is.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	No, Include more resent relevant literature	Ok, I will add
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes, May check with professionals	Yes
Optional/General comments	<ul style="list-style-type: none">To include detailed information on the propagation media, focusing on their composition and physical structure with recent citationsAdd discussion in results with resent literature (Most of the parameters not discussed properly)	Ok, I will add

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, kindly please write down the ethical issues here in details)</i>	No
