

Review Form 3

Journal Name:	Asian Journal of Research and Reports in Hepatology
Manuscript Number:	Ms_AJRRHE_125772
Title of the Manuscript:	"Allopurinol and Liver Cirrhosis Complications: A Call for Further Investigation"
Type of the Article	Letter to Editor

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript highlights the potential of allopurinol as a cost-effective treatment option for managing complications in cirrhosis patients, addressing a critical gap in current therapeutic strategies. Its findings not only emphasize the need for further clinical investigations but also offer the possibility of improving patient outcomes and reducing the global burden of liver disease, particularly in resource-limited settings.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No suggestion as it's a letter to editor	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically robust and technically sound because it presents evidence-based findings from a recent 2023 clinical study, employing a randomized controlled trial design, which is the gold standard for clinical research. The statistical results, such as hazard ratios and confidence intervals, are clearly reported, reinforcing the reliability of the data. Additionally, the manuscript is grounded in well-established biological mechanisms, like the role of xanthine oxidase in oxidative stress and liver fibrosis, further supporting its scientific validity.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Add few more references.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	Overall acceptable	

Review Form 3

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
