

Review Form 3

Journal Name:	International Journal of Advances in Nephrology Research
Manuscript Number:	Ms_IJANR_126117
Title of the Manuscript:	Usefulness of biochemical markers in monitoring renal function in chronic kidney disease
Type of the Article	

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Not much impact on scientific community, as all biochemical parameters are proven and established since last few decades. All finding related to treatment is also common finding. eGFR is commonly used by all nephrologists and physician s since last two decade.	Noted
Is the title of the article suitable? (If not please suggest an alternative title)	Not much interesting and significant title	Done
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is required to correct. Not proper Grammer checked. Unit of GFR is not mentioned properly	Noted
Are subsections and structure of the manuscript appropriate?	All Subsections are covered. But no specific correlation is established by statistical tools and no images or graphs were shown.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is not covering new biochemical markers. Author designed study on conventional marker, which are used since last few decades. He / she has not given any information about proteinuria or albuminuria, which can give better correlation with other biochemical parameters used by author.	Revised
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Sufficient and recent references	ok
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Required to review manuscript. Repetition of few terms and words are there.	
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
