PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	I went through all the manuscript contents. I was expecting something new from the title of the manuscript. The write up in “abstract” and “challenges and future directions” sections are vague and fruitless. A review manuscript should be comprehensive and providing something new instead summarising what are available in literatures.

Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It is vague.

Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Not sound for publication	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are not enough and recent.
