

Journal Name:	Asian Journal of Research in Biosciences
Manuscript Number:	Ms_AJORIB_1787
Title of the Manuscript:	THE PERFORMANCE OF MONGREL RABBITS IN A TROPICAL ENVIRONMENT
Type of the Article	

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Important Policies Regarding Peer Review

Peer review Comments Approval Policy: <https://r1.reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1.reviewerhub.org/benefits-for-reviewers>

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript is of significant importance to the scientific community as it provides critical insights into the adaptability and productivity of mongrel rabbits under tropical conditions. This study highlights key performance metrics and body measurement indices that can serve as benchmarks for breeding and management strategies in regions with similar climates. The findings contribute to the understanding of genetic and environmental interactions affecting livestock performance, especially in the context of climate variability. Furthermore, it offers valuable data for researchers and farmers aiming to enhance rabbit production as a sustainable protein source in tropical agricultural systems.	
Is the title of the article suitable? (If not please suggest an alternative title)	THE GROWTH PERFORMANCE AND LINEAR BODY MEASUREMENTS OF MONGREL RABBITS IN A TROPICAL ENVIRONMENT	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	“This study investigates the growth performance and linear body measurements of mongrel rabbits raised under tropical conditions, providing empirical evidence for their viability as a sustainable protein source in Nigeria.” This will be an introductory prose of the study.	
Is the manuscript scientifically, correct? Please write here.	All the Tables are scientifically oriented.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	I suggested new full/additional references in the reviewed Manuscript at Comment {U38}.	
Is the language/English quality of the article suitable for scholarly communications?	Yes in a greater note.	
<u>Optional/General</u> comments	Observation the Author should state the Location in Nigeria and effect all I have added in the Materials and Methods of the reviewed Manuscript document as these would make better the hypothesis and reference of this current study if someone wishes to further study in that location. And the Experimental animal and management should follow as suggested in reviewed document. Also the progenies number of parity should be made know by Author	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
