

Editor's Comment:

I have carefully read the revised manuscript and found out that the authors have responded to only one or two comments I provided last time.

The following suggestions have not been addressed:

Authors have addressed most of the comments and suggestions provided by the two reviewers. However, I have discovered the following flaws with the revised manuscript:

1. Subheadings are not needed in the abstract.
2. All keywords duplicate the same as in the paper title. Other selections must be re-chosen.
4. Table 1 and Figure 1 have not been referred to in the text.
5. All equations should be numbered in the text, even though there is only one equation.
7. One of "Table 3" referred to in the text should be "Table 4".
8. One of "Table 4" referred to in the text should be "Table 5".
9. Please re-check the headings in Table 5. Is "Multiple R^2 " = "Multiple R" x "Multiple R"?

Therefore, I am afraid I may not be able to approve this paper for publication acceptance.
