

Editor's Comment:

I have discovered several flaws with the revised manuscript:

1. Two of the keywords duplicate the same as in the paper title, "income diversification" and "Tamil Nadu". Other selections should be re-chosen.
2. Significant levels in Table 3 must be carefully re-checked. Some high β values are not even significant to 10% level. Besides, the footnote for "*" should be 10 percent significance, not 1 percent.
3. What is "Gol" in the first reference listing?
4. Many spacing errors have been detected in the reference listing also.

Should the authors modify the above-mentioned flaws, this revised manuscript is readied for publication acceptance.
