

**Editor's Comment:**

For the revised manuscript, I have the following suggestions for the authors to further improve the quality of this paper:

1. The paper title must be modified as recommended by one of the reviewer as "Structural breaks, growth and instability test in onion cultivation: A case of Saurashtra Region of Gujarat".
2. Also, the abstract should be condensed to only one paragraph as suggested by the same reviewer.
3. All the keywords duplicate the same as in the paper title. Other selections must be re-chosen.
4. "Chow" is an author's name. It must be capitalized throughout the entire text.
5. Why the equations after equation [11] have not been numbered?
6. Many spacing/punctuation errors have been detected, such as "Student't' test".
7. A thorough and serious proof-check and English check is desperately needed.

If the authors agree to modify and improve the revised manuscript according the above-mentioned comments, this paper is acceptable for publication.
