

**Editor's Comment:**

My decision for the manuscript AJAEES\_87143 is that it needs major revision to be publishable.

The subject of the article is interesting but it is important to improve significantly. My most highlighted comments are the following:

1. The sample size is limited but could be accepted somehow.
2. The statistical analysis is very poor as the authors use only frequencies to describe and analyze their purposes.
3. The analysis of the results is very brief also.
4. There is no Discussion section to compare the study results with similar studies.
5. References are poor and the bibliography needs enrichment.

Generally, the manuscript needs enrichment and reformulation.
