

Editor's Comment:

The revised manuscript is readied for publication acceptance on the conditions if they will

correct the following minor flaws:

1. Some keywords duplicate the same as in the paper title. Other selections need to be re-chosen.
2. Sub-heading are not necessary in the abstract.
3. Use "metric" unit as much as possible.
4. Practical implications derived from this study should be emphasized in the abstract as well as in the conclusion.
5. Please use "and" instead of "&" throughout the entire text.
6. All acronym names must be defined when first appear and be used thereafter.
7. The main heading should be "Results and Discussions".
8. No "arrow" symbol should be included in the x-axis label.
9. A thorough proof-check (especially on the spacing) and English check is recommended.
