

Editor's Comment:

I have read through the comments of the two reviewers (Dr Ahmed D Abdulwahab and Dr Jean Marie Vianney Hope), both recommended minor revision. Also, I have gone through the original and the revised manuscript, the author/s had effected the comments and corrections made by the reviewers.

In view of this compliance by the author/s to the reviewers' comments, I advise and recommend that the manuscript number: 2022/AJORR/84538 be accepted for publication in the Asian Journal of Orthopaedic Research.
