

**Editor's Comment:**

The editorial decision for the manuscript entitled "**Acute Kidney Injury Due To Wild Mushroom Consumption: Hemodialysis And Ozonotherapy Combination A Therapeutic Asset (About One Case)**" is **REJECT** as the authors have not incorporated the few reviewers suggestions. Moreover, inspite of asking to change the color of the words from green to black it was not done. The toxins that are generated during ingestion of wild mushrooms is not mentioned in the article. The mechanism of action of toxins on kidney function is not given.
