

Editor's Comment:

You can accept manuscript No. 2022/APRJ/84166. Just a minor correction on page 11 of the Revised - ms_APRJ_84166_v1 after the last paragraph of the Discussion section (4). The request by the reviewer which reads as "**discussion regarding the crop production and consumption is needed (table no. 5)**" should be addressed and issues surrounding that aspect, be incorporated in the discussion.
