Editor's Comment:

Regarding the above-mentioned paper:

<mark>Accepted after following revision</mark>

Very interesting and actual the subject.
But, from the fields to implement AI presented, which is or are the field (s) predisposed to a faster implementation of the AI?
At the same time, the main information source is that link from 2019. During pandemic or even manifestations of the crisis, have there been changes in the pace/rhythm of introduction of the new technologies/AI, or even the areas in which AI should be implemented with priority?
Thirdly, the Recommendations to be included after the Conclusions.
