

## Review Form 1.6

Journal Name:	<a href="#">Archives of Current Research International</a>
Manuscript Number:	Ms_ACRI_75196
Title of the Manuscript:	Multiparametric rational solutions of order N to the KPI equation
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The author is doing the work for Multiparametric rational solutions of order 3 to the KPI equation. However, there are no enough results or proved that this should valid for the order N of the KPI equation. More works for generalization are needed to be the solutions of order N of the KPI equation.	The proof is the same as it was done in the paper oy B. Yang and Y. Yang. It can be done by the reader with the quoted paper in references. Meanwhile, I have given a sketch of the proof in the text.
<b>Minor</b> REVISION comments	The title should be <b>Multiparametric rational solutions of order 3 to the KPI equation</b>	I propose the following title : Multiparametric rational solutions to the KPI equation and the explicit case of order 3.
<b>Optional/General</b> comments	The Author works seen to be similar to work of P. Gaillard except for the use of different parameters.	This paper is an extension of a previous one from the same author which treated the orders 1 and 2 without general formulation of the solutions.

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
