PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Follow the reference and table style given under authors guidelines	
Minor REVISION comments	<ul style="list-style-type: none">- References must be provided in the methodology section- The name of the software as well as the version used should be included- The author should elaborate more on the interpretation of the results and in some cases give the averages of the tables- To better interpret the results, the author could review the analysis of the data and redo it by day (Day 0; 1; 2 and 3). For each day, for example, an analysis should be done, which would allow for better interpretation and comparison of the results.- The titles of the tables should have the same font size as the rest of the text- The discussion section has very few references and they are not well written- The references should meet the authors' guidelines	Ok, thanks. Work was done 2 years ago, raw data could not be retrieved for analysis to be repeated.
Optional/General comments
