PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The study is not argumentative and does not address gaps. Problem statement. Aim and objectives. Literature Review (no empirical evidence). References. Authors have used old sources which makes the study irrelevant. Everything must be linked together. The authors are supposed to only use English instead they are using different languages which makes it difficult to read the paper. Document analysis alone does not provide sufficient argument, it is like you coping information from one document to another. I suggest you add thematic analysis and interviews to strengthen your study.	Thank you. We now address the problem and the objectives of the study. In this document we analysed documents about legislative, political and organisational framework of SLM in Benin. The analyse by interviews of actors is for another chapter of our research. The language is all traduced in English.
Minor REVISION comments	See minor revision comments on the script.	
Optional/General comments
