PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Introduction is very elaborate which should be shortened. Must maintain the sequence. It needs significant improvement and should be written para-wise other than point wise. Article should be written in passive/past form. Many citations in body are absent in the reference part. "percent" or "%" should be noted in a uniform manner. Conclusion should be improved and state the key findings/outcome of the whole study and does not include any references.	I have tried to give all major and minor correction. THANKS
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Overall writing of the article is fine. Specially Results and Discussion part. If proper revisions are done as suggested it will carry better info for the readers.
