

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Agricultural Extension, Economics &amp; Sociology</a>
Manuscript Number:	Ms_AJAEES_88895
Title of the Manuscript:	A review on potential of field crops in Phytoremediation.
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarrb.com/index.php/ARRB/editorial-policy> )

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	Well written paper, but the paper projects the fact that Phytoremediation is a very easy process. while talking about positives, I feel there must be some negatives too. Agreed it's a good technique but its not practised widely and why must also be highlighted. A balance of both are needed. Also if one could have mentioned about the techniques used in Phytoremediation to remove heavy metals and dispose off the plants.	Thanks for your suggestion but on a industrial scale no one provides a head towards it. if we will start this technique on graduate level in our universities it will be helpful.
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
