EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
1. Though the work seems to be interesting and demonstrates practical importance there are some drawbacks. I have corrected several misprints indicating them by red colour. Besides, to my opinion the authors should change the whole text and not to repeat in the text the values indicated in Tables. As far as I know it is forbidden. Besides Figures should be deleted as they repeat both the text values and values of the Tables. Furthermore, the conclusion is too large. It should be compact and should highlight the main results of the work	1.I have corrected all the grammatical and spelling mistakes that you have mentioned in my manuscript. 2. As it is mandatory to mention the values in the text that are in the tables, i did not change it. 3. Figures are also much needed in the article. 4. As per the recommendation of co-author, the conclusion i have mentioned is much precise clear.
