PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Study the observations carefully and effect the corrections.	I have studied the observations carefully and effected the corrections on the manuscript as suggested by the reviewer. However, family name is not written in italic so I did not accept that correction. According to International Code of Nomenclature for Algae, Fungi, and Plants, Shenzhen Code, 2018 and The International Code of Nomenclature for Cultivated Plants, 9th Edition, 2016, family name should be written in plain type (not italicized) with first letter capitalized. Again, common names are written in parentheses so I did not italicize the common names of Jatropha in the revised manuscript as suggested by the reviewer. Italicizing them would make them appear like generic epithet.
Minor REVISION comments		
Optional/General comments	A very good initiative especially on an crops that are not popular.	I am glad with the reviewer's commendation
