## Review Form 1.6

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ol style="list-style-type: none"><li>1. The paper lacks motivation. The authors need to add relevant implications of the study in the last para of the Introduction section.</li><li>2. The Materials and Methods section is very brief. The authors should more clearly discuss this important part of the paper. The authors also need to indicate the factors considered for their analysis. They also fail to mention the mode of data collection. Due to the covid-19 restrictions, there might be some difficulties collecting data physically. If they had preferred online or social media sources, they should properly mention them. They should also not forget to mention their target audience.</li><li>3. The authors should present a few tables to support their findings. They should connect their findings with prior studies. I mean that they should either support their findings with previous studies or contend prior findings with their own.</li><li>4. More importantly, the authors are not aware of current research in their field. The citations are too old. The authors should either add a separate Literature Review section after the Introduction or discuss a few relevant latest literature in the Introduction part itself.</li></ol>	<p>The implication of the study has been added</p> <p>In this paper, what is interpreted are the characteristics of the selected market based on data from tourists visiting the Canggu suburban area.</p> <p>Respondents/audience are tourists who actually visit the Canggu area.</p> <p>The description of findings in conclusion</p> <p>The manuscript has followed the SDI paper templete</p>
<b>Minor</b> REVISION comments	<ol style="list-style-type: none"><li>1. The last line in the abstract needs to be rewritten. "Two guidance for the development of sustainable tourism products can be recommended in the suburban area of Canggu, that is: 1) promoting homestays and local culinary facilities."</li><li>2. The very first sentence in the Introduction section, "The suburban area is the location for the development of new industries and settlements, as a result of the development of an urban area. Suburban areas are caused by the suburbanization process." needs to be rewritten.</li><li>3. Several grammatical errors exist in the manuscript. The manuscript should be thoroughly proofread before submission.</li></ol>	<p>Second recommendation has been added</p> <p>The sentence has been rewritten</p> <p>The grammar has been fixed</p>
<b>Optional/General</b> comments	The authors present the topic "Suburban Tourism Market in Canggu, Bali" to identify the characteristics of the tourists in the Suburban Tourism Market in Canggu, Bali. Although the topic seems interesting, the paper needs some revisions to improve its quality before being accepted for publication. However, I appreciate the efforts of the authors.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
