PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Considering the enormous problem of the impact of untreated, polluted wastewater on the environment and human health, this manuscript has a positive initiative in an effort to reduce their negative impact with a simpler, more accessible method. With the choice to monitor the behavior of only three wastewater quality parameters (TS, TSS and COD), the question is how well the applied (laboratory biotower septic tank system) LBTST can remediate the impact of other, complex pollutants from wastewater.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
