	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>Title A good title that reasonably clear and appear to be sound as the authors describe their attempt to assess the water quality from the point sources which is abattoirs.</p> <p>Abstract Good however the conclusion does not draw the aim of study well.</p> <p>Introduction and Literature Review Provides a brief and persuasive rational for selection of the problem as well as clearly identifies the problem and its boundaries. Very good in draws upon multiple sources of information to substantiate the existence of the problem, however, no information found for the effect of heavy metals to the environment and user.</p> <p>Material & Method Very good methodology to achieve the stated objective.</p> <p>Results and Discussion The analysis of all sample by the stated parameters are well presented in a logical order as well as present satisfactory reasons for findings. Only a little correction needs to be done. Please refer to the attach manuscript.</p> <p>Conclusion Very good in draw reasonable conclusion(s) based on the research findings and present implications of the findings.</p> <p>References All the citation and references are following the format according to the journal AJB2T.</p>	All corrections and revision have been made
