PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Elaborate the research problem in a clear way Add more references Improve literature part Make a table case studies	Marine wastes include fish heads, tails, fins, viscera, and chitinous prawn shell components. Processing these wastes for the creation of commercial value-added goods may result in a reduction in manufacturing costs. Furthermore, we can prevent contamination of the environment and health risks caused by incorrect trash disposal. It was anticipated that this enzyme will be useful in a variety of sectors. References added There are no case studies, it is the production of an enzyme.in place of case study some literature added
<u>Minor</u> REVISION comments	Rearrange the discussion part	Done
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	No ethical issues.
