

Review Form 1.6

Journal Name:	Asian Journal of Biotechnology and Genetic Engineering
Manuscript Number:	Ms_AJBGE_83956
Title of the Manuscript:	Plant bioactives and biotechnological approaches to enhance their production and bioactivity
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The Review manuscript “Plant bioactives and biotechnological approaches to enhance their production and bioactivity” has covered a vast aspect of natural products and their value addition through biotechnological approaches like fermentation, plant tissue culture, metabolic engineering, genetic transformation, plant cell elicitation, microencapsulation and their applications as antioxidants, anti-inflammatory agents, anti-diabetic and anti-cancer agents . The manuscript is of great scientific importance in terms of the current trend on applications of recent biotechnological tools in the production of plant bioactives and other natural products. Overall, the manuscript is meaningfully and lucidly well written, scientifically robust and technically sound. Hence as a reviewer I am recommending to accept the review manuscript as it is.	Thanks for the comments
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
