

Review Form 1.6

Journal Name:	Asian Journal of Biochemistry, Genetics and Molecular Biology
Manuscript Number:	Ms_AJBGMB_83973
Title of the Manuscript:	Is Angiotensin Converting Enzyme Insertion/Deletion (rs1799752) Polymorphism Associated with Breast Cancer Risk in Egyptian Population?
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajbgmb.com/index.php/AJBGMB/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The research is very good, as the idea is recent and the way to find the relationship between heterogeneity and the occurrence of breast cancer is good, as this type of cancer is common in women, so finding the initial principles for diagnosis or the possibility of preventing the development of the disease is great.	Many thanks. Really it takes time to be achieved.
Minor REVISION comments	The idea is good, the sources are modern, and the review of the result is good	Many thanks.
Optional/General comments	The idea is good, but if you use the sequence method to diagnose heterogeneity, it is better or use a method RFLP	Many thanks. We did not use RFLP. We use PCR with sequence can be differentiate between the two SNP in only one step PCR.

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	The work was performed under the ethical condition of the university.
