

Review Form 1.6

Journal Name:	Asian Journal of Biochemistry, Genetics and Molecular Biology
Manuscript Number:	Ms_AJBGMB_84589
Title of the Manuscript:	Prevalence of three prothrombotic genes polymorphisms: Factor II, Factor V and MTHFR in referred population of Gujarat.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The last sentence in the discussion section should be written in the result section. Similarly, table 3 should be placed in result section.</p> <p>Authors should correct spelling mistakes.</p>	<p>The sentence of Discussion section is shifted to Result section.</p> <p>Table 3 is shifted to result section.</p> <p>Spelling mistakes are corrected.</p>
<u>Minor</u> REVISION comments	<p>The subject of the study fits the scope of the journal and it may increase interest.</p> <p>- The paper is in general well written.</p> <p>-The paper is clearly written and well-constructed.</p> <p>-The manuscript may be accepted after the minor revision.</p>	<p>Thank you for encouraging comments.</p>
<u>Optional/General</u> comments	<p>Did the authors measure the yield and purity of DNA with the Nano Drop spectrophotometer? If the measurement has been made, the author should write it in the material method section.</p> <p>Authors could define the exclusion and inclusion criteria in detail in the method section.</p>	<p>Following details are included in method section: DNA was quantified using Qubit 2.0 fluorimeter with Qubit dsDNA HS assay kit as per instructions provided in the kit manual. DNA working solution of 100ng/µl was prepared for each sample and used further for PCR and sequencing.</p> <p>Following details are included in method section: Inclusion: Patients Aged >18yrs and referred by a physician for test, were included in the study. Exclusion: There was no exclusion criteria.</p>

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
