

Review Form 1.6

Journal Name:	Asian Journal of Biochemistry, Genetics and Molecular Biology
Manuscript Number:	Ms_AJBGMB_84613
Title of the Manuscript:	Coronavirus Disease (COVID-19): A Biochemical Perspective
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajbgmb.com/index.php/AJBGMB/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Most of the articles cited in this review are medical records from 2019 and 2020. Whether there is any difference in blood biochemistry after infection of human body with novel Coronavirus mutation is worthy of attention and should be mentioned in this article.	Medical journals also included in study. There is no such specific effect of mutaion on corona virus are found. The articles are also not found.
Minor REVISION comments	In the review of the systemic manifestations of COVID-19 patients, whether the cited articles exclude bacterial infection or other factors that may cause changes in relevant indicators, such as CPR, PT, D-Dimer.	No sir The cited articles are not excluded bacterial infection.
Optional/General comments	It is suggested that this review can better reflect the biochemical characteristics of COVID-19. In my opinion, this review mainly describes the biochemical changes after severe infection, especially the lack of systemic characteristics of COVID-19 infection.	Agreed Most of the infected patients are with co-morbidty. Data is not available which shows changes in biochemical parameter only because of covid 19 infection.

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
