PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Abstract did not dwell on other aspects of an abstract, the author only talked about the background and aim of the study. Methods, result and conclusion are absent even though this is a case study. Do more discussion on the study, taking into account the differential diagnosis, implications, deductions, similar disease condition in other clan and location and also the prognosis.	Modified as suggestion
Minor REVISION comments	Introduction is too short, need a beef up to include the CD Color Doppler Ultrasound modality, body biochemistry changes and laboratory profile. In the case report, what is the ultrasound scan examination performed? Fig 1: Author to crop off more areas of patient's identity Check typographic errors, spellings and grammar	Modified as suggestion
Optional/General comments	Good case study	Ok
