

Review Form 1.6

Journal Name:	Asian Journal of Case Reports in Surgery
Manuscript Number:	Ms_AJCRS_84499
Title of the Manuscript:	Pleural Fibroma Presenting as Spontaneous Pneumothorax in Late Pregnancy, an Exceedingly Rare Co-occurrence: A Case Report
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajcrs.com/index.php/AJCRS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	Good review of the current literature. Just an additional thought- leaving the tube in for 11 days as in this case will also cause mechanical pleurodesis. Also would be interesting to see how the pleural lesion evolved at follow up chest radiology.	Thank you for your enlightening comments on pleurodesis. We did not discuss pleurodesis as this was another large facet to embark upon. With regards to the whether the pleural lesion had any evolving changes at follow-up, there was no observed change on repeat radiologic imaging (this has been added and highlighted for your scrutiny).

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
