PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Topic-important Case presentation= not in detail History Physical findings Investigations done should be described In details Imaging = XRAY and Ultrasound should be displayed Procedure = was done desperately in the third operation. Even though gastrostomy is novel and the idea is appreciable it was not planed ahead	Firstly, thank you for taking the time to review the paper. All comments were taken into consideration and changes were made accordingly (highlighted). Details of the clinical presentation and radiology findings were noted. Unfortunately, an image could not be attached due to technical reasons, however the major finding was reported. The gastrostomy was more of an innovative approach of managing proximal perforations, and so the title has been changed to reflect that.
Minor REVISION comments	None	
Optional/General comments	None
