### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajcrs.com/index.php/AJCRS/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	It is an interesting case and rather straight forward. More things about enterolith pathogenesis such as narrow neck of the diverticulum should be added. Moreover a few words about possible pathogenesis of the second diverticulum are necessary. It would be interesting also the add something for possible endoscopic identification or treatment or other nonoperativetreatments Of course the condition of the patient led to the operation room for an immergent operation	thank you for your comments. Done as possible
<b><u>Minor</u></b> REVISION comments	None	
<b><u>Optional/General</u></b> comments	None	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
