Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>In my opinion, must be taken into account.</p> <ul style="list-style-type: none">- The introduction section is too short. What is the incidence of foreign body aspiration in different pediatric age groups- What were the findings on the physical examination for case 1- What were the findings on chest auscultation?- Please provide physical examination findings for case 2.- Provide the figures for case 2- The language can be effectively applied; there are several typos and grammatical problems.- For case 1 author mentioned that “She was started on Intravenous dexamethasone, antibiotics, and nebulization.” What kind of antibiotics and steroids and at what dose they were given? Please mention for case 2 also- For case 2” Computed tomography (CT) scan was done which showed a foreign body in the right main bronchus and right lower lobe collapse” please provide a CT image.	<ul style="list-style-type: none">- Studies illy defined the incidence of FB aspiration. Most studies found in the lettricture reports the fatal FB aspiration and history of chocking.- Added to the case presentation- Added to the case presentation- Added to the case presentation- No figures available for case 2. CT can done outside our hospital- Language edited as advised- Dose of steroid was calculated based on child weight as it is a pediatric age group. Antibiotic was added to the text- Not available in the hospital system since the case was referred from outside center.
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
