PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Visual observation is not enough for research analysis, if possible add more scientific data and observations for Migratory birds and Gangetic Dolphins. You may add availability of food, weather differences, human activity in the prescribe area.	This investigation was completely based on our visual observation and we have found some uncommon behaviours in these animals during and after lockdown.. Prolonged stay of migratory birds were never seen earlier in this sanctuary .Availability of fishes in the river Ganga due to complete ban on fishing activity during lockdown is another important reason which kept the birds and dolphins more active , incorporated in discussion part (highlighted in yellow colour)
Minor REVISION comments	1. Grammatical and typological mistakes should corrected (In manuscript word file indicated by blue and red line) 2. Photograph should be big and visible.	All grammatical and typological mistakes have been checked and corrected properly. Photographs have been magnified.
Optional/General comments
