PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	It is not possible to draw general conclusions without relevant numerical data. Descriptive ones give us personal revision and problems without a clear picture in the whole sample. Some minor spelling and grammar errors. More text format errors (font size, etc.).	I agree
<u>Optional/General</u> comments	Possibly, this may not have been enough relevant for the case study: "the whole group of 55 students consisted of 54 women and one student"	Generally teaching for the infant grades is a female dominated profession

PART 2:

	<u>Reviewer's comment</u>	<u>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</u>
<u>Are there ethical issues in this manuscript?</u>	<u>(If yes, Kindly please write down the ethical issues here in details)</u>	<u>Yes there are, Participation was voluntary</u> <u>All the 55 students had the option of participating in the study, but when I indicated that participation is voluntary 10 of these responded. Some responded very briefly, I could tell they were not keen to participate then purposefully followed up with those who showed much interest</u>
