PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Researcher has developed a tool in the form of questionnaire which needs to be tested by many psychometric tests to make it valid and objective so in this case construct validity (both convergent and discriminate validity) and other necessary psychometric procedures like skewness, kurtosis, exploratory factor analysis and confirmatory factor analysis is missing in this study. Researcher has not clearly mentioned the sources and other authentic work relevant to construction of statements used in the study to obtain responses from participants.	Revised
Minor REVISION comments	Grammatical mistakes have been found in many sections of research paper particularly in conclusion part. Discussion part is missing and interpretation of tables needs to more clear and precise and studies mentioned in interpretation of tables should be removed and added in discussion part.	Corrected
Optional/General comments	Researcher has not followed reference style as per the guidelines of journal.	Noted
