

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Education and Social Studies</a>
Manuscript Number:	Ms_AJESS_85794
Title of the Manuscript:	Research on the Instructional Design Ability of Pre-service Mathematics Teachers in China
Type of the Article	Review Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajess.com/index.php/AJESS/editorial-policy> )

## Review Form 1.6

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The topic of the study seems contemporary and significant. However, the author(s) are required to improve the manuscript in some aspects, which are highlighted below:</p> <ol style="list-style-type: none"><li>1. It is necessary to highlight the research gap in the abstract, and elaborate on this in the introduction section.</li><li>2. Please briefly mention the type of study and explain the method used i.e., where do you get the data and how many and how you gain/filter/analyze the information/data. You need to elaborate on the same in the method section.</li><li>3. Please also mention if you used any specific theory/framework/ approach or software.</li><li>4. Please conclude the abstract with a sentence mentioning the significance/implication of this study, which you can further discuss in the conclusion.</li><li>5. The introduction of the study could be more elaborate by citing some recent references to convince about the claim of the author that there is a growing research interest on the instructional design ability of pre-service mathematics teachers in China etc. Otherwise, the rationale of the current study will not be established. This part of a study needs to highlight more on the gaps and novelty of the study.</li><li>6. It is essential that a section with the details of methods of the study is added after the introduction section. In the method section the author needs to first mention the type of this research. If it is a review article, it is necessary to explain how many studies were collected, how those studies were filtered, and how the author selected proper information. Sources of Literature, Data Sources, Data Collection, Data Sorting etc. in this manuscript may come under the subheadings of the section.</li><li>7. There is a need for more elaborate explanation on data analysis, i.e., the stages of analytical procedure. The analytical stages can be further demonstrated later in the results section through visual representations such as tables/figures etc.</li><li>8. Please ensure correct use of in text citations.</li><li>9. I suggest that the results of your review are presented in a table, instead of lengthy discussion.</li><li>10. As mentioned above in number 4, the significance/implication of this study need to be highlighted in the conclusion.</li></ol>	<p>Thanks for your professional review work on our article. we have corrected the errors with all the corrections highlighted in yellow color.</p> <ol style="list-style-type: none"><li>1. The abstract had added significance of this study.</li><li>2 The research methods have been added. We explanted where get the data and how many and how to gain and filter the information. data analysis becomes more elaborated.</li><li>3. The rest of the article has been reviewed and revised again.</li></ol>
<b>Minor</b> REVISION comments	<p>I also recommend rechecking the language carefully to ensure grammatical correctness and style of academic writing.</p>	<p>Thanks for your comments, we have checked and revised this article.</p>
<b>Optional/General</b> comments	<p>All necessary comments are highlighted above.</p>
