### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The first aspect to be considered is to respect the scope of the journal.	Thank you very much for your valuable comments.
<b>Minor</b> REVISION comments	In the section -Research Results- my suggestion is the actors make a table with transcription of the data, the paper will win visibility, easy understand and more fluidity.	Please note that the construction of a table with transcription of the data was one of our considerations; yet, this is a qualitative research, so we avoided to quantify the data, as this could be conducive to a limitation of words which are necessary to explain our qualitative data.
<b>Optional/General</b> comments	Great job! The paper in general is written very good. However, the actors could have been more direct.	Please note that special attention was given to the manuscript regarding style.

### PART 2:
