Compulsory REVISION comments	This is an essay with an extensive and rather disorganized analysis of the curriculum. No research question can be inferred, and no method is clearly established. There are several opinions, positions and statements unsupported by data.	What you are saying is correct sir. Only, it is presented in this work the result of the observations made in relation to the practices of academic orders in Cameroon. Many disturbing facts emerged and constitute relevant results to be used not only in Cameroon, but also in all countries falling into such difficulties. So what you see there are results. At the same time, they induce the beginning of the proposal which is discussed here, in particular the implementation of the interdisciplinary evaluation approach. It aims to bring everyone to realize that a reorganization of programs is possible, with the aim of bringing together the different pedagogical departments around the same themes. We could then break down the barriers that have always existed between the pedagogical departments in the educational system of Cameroon, thus delivering young people to idleness at the end of their academic course.
