PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Compulsory REVISION comments	Thank you for your hard work and kind efforts in revising our manuscript. Regarding the ABSTRACT, we followed the journal's style that is why we didn't write it in a single paragraph. We corrected the manuscript as per your suggestions and concerns. Regarding the detail explanation of heavy metal analysis; we provided the details in the following section (please see- 2.4). For statistical analysis, we conducted one way ANOVA as we are focused only on the comparison among species only not among farms. That is why we didn't run Two-way ANOVA despite there are multiple variables. References have been updated and other comments are addressed according to the reviewer.
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
