PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Some information should be added in order to improve the manuscript, the methodod section should be more especific in fish the maintenance.	It seems more beneficial economically to produce Clarias gariepinus on 3:1 female-male ratio as carried out in this study. The ratio of 1:1 proposed by the reviewer will be examined alongside other ratios in future study. Single induction received one decisive dose. Double induction received primer and booster doses within 6 hours interval; while multiple inductions were administered once a week for 28 days. Age of brood is specified.
Minor REVISION comments	Take care of the font type and size throughout the text	Noted. Correction effected.
Optional/General comments	The manuscript is well redacted with clear obectives and conclusions, however it is necessary to improve the method section.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
