Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>This short research article it is well written, clear. It deals with a central issue, not only in India, but also in Europe, for example. Bioethical training on informed consent of young physicians is an interesting aspect that deserves to be discussed.</p> <p>Just a few small suggestions. The bibliography should be increased a little more, regarding the background on informed consent in India and the bioethical and formative reflections related to it: as. Es.: 1 Nijhawan LP, Janodia MD, Muddukrishna B S, Bhat K M, Bairy K L, Udupa N, Musmade PB. Informed consent: Issues and challenges. J Adv Pharm Technol Res 2013;4:134-40;</p> <p>2 JACOB, K. S. Informed consent and India. The National Medical Journal of India, 2014, 27.1: 35-38.</p> <p>It is important to take into account studies from a few years ago, to reconstruct a minimal time perspective: how were things about Informed Consent ten years ago? And now? The problem of training young doctors, with regard to informed consent, in fact, is not a problem only in recent years.</p> <p>There are also some publications that can be used for some more comments on the future of bioethical awareness regarding informed consent and the need for training of health professionals, in all fields of medicine. Some ideas can be drawn from a recently published article: Amrita Shenoy, Gopinath N. Shenoy, Gayatri G. Shenoy, Informed consent: Legalities, perspectives of physicians and patients, and practices in OECD/non-OECD countries, Médecine Palliative, Volume 21, Issue 1, 2022, Pages 11-19, ISSN 1636-6522, https://doi.org/10.1016/j.medpal.2021.07.004.</p>	Agreed
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	No ethical issues
