	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. What are the general evaluation parameters for microneedle formulation?2. How to assess the drug release from the formulation?3. How to assess the drug efficiency to treat the Diabetes.	All the points which mentioned here are added and highlighted.
Minor REVISION comments	<ol style="list-style-type: none">1. In 4th page, under "Microneedles: A New Approach", the term "Nanoneedles" is mentioned. Clarify it whether it is Microneedle or Nanoneedle?2. What is the mechanism of drug permeation across the skin through transdermal route?	<ol style="list-style-type: none">1. Micro needle not Nanoneedle. The mistake has been rectified .2. Drug formulations are applied to healthy skin and then deep into the dermis and epidermis without getting trapped in the dermis. Transdermal Drug delivery is a painless method to deliver drugs systemically. The drug penetrates the stratum corneum, and then passes through the deeper epidermis and dermis without getting trapped in the dermis.
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
