| Type of the Article      | Case study  |

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajmah.com/index.php/AJMAH/editorial-policy> )

### PART 1: Review Comments

|                                     | Reviewer's comment   | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)  |
|-------------------------------------|--|--|
| <b>Compulsory</b> REVISION comments | Major: remove patients name from mri images. The mri scans look like her head has been flattened from side to side. If this is just due to resizing of original image, correct it.                             | The images in my article do not have the patient's name. For better reference, I have attached the MRI images separately in the email.   |
| <b>Minor</b> REVISION comments      | Minor: did these grow in "ordinary " blood cultures or require special media? Did it grow within 24 or 48 hours or need longer? Anyone else in family or community affected? How long treat with trimethoprim? | It required special media like MacConkey agar and blood agar.<br>It grew within 48-72 hours<br>No one else in the family or community was affected<br>Patient was treated for 3 days and got discharged due to logistic issues |
| <b>Optional/General</b> comments    | Text is clear and useful.  | Thank you  |

### PART 2:

|  | Reviewer's comment  | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
