

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Medicine and Health</a>
Manuscript Number:	Ms_AJMAH_86069
Title of the Manuscript:	Prevalence and Symptomatology of People with Covid 19 in Rivers State
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajmah.com/index.php/AJMAH/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	After 2 years of pandemic, the results obtained in this study have already been exposed in other studies, only what was already known was corroborated, and that is that asymptomatic people can transmit the disease, I see the value of work rather at the local level. Regarding the symptomatology, it coincides with other works, but it was not determined if it is the original strain or if it is already a variant. We have seen that other variants show some differences in symptoms	Revised
<b>Minor</b> REVISION comments	In view of the fact that the disease was detected in Africa in February 2021, the study also gains value, since it is important to stimulate research in places considered vulnerable.	Noted
<b>Optional/General</b> comments	The diagnostic methods were adequate, only it would be necessary to check if those asymptomatic patients who scored positive were no longer infectious.	Noted

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
