General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajmah.com/index.php/AJMAH/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The extension of the work seems somewhat short to me, I would have done it for 6 months. Tables are a bit difficult to understand, although I don't know if it's due to word's page layout.	We thank the reviewers for their valuable comments in order to improve the quality of the manuscript. The time length is short due to the limitations of the place with subjects. The tables are suitably presented according to the manuscripts necessity, maybe due to the words layout it is difficult to understand.
fiOptional/General comments	The work seems very good to me, because it puts into scientific evidence what seems obvious to us. This means that we have academic support in any similar situation.	Thanks to the reviewers for their valuable comments.

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
