PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. Based on the conclusions obtained, it needs to be adjusted to the title and research objectives.2. Special attention to the word preliminary survey of percent in the title with quantitatively determine the organoleptic attributes in the research objectives and conclusions that focus on the characteristics of the cooking oil studied.	<ol style="list-style-type: none">1. Title was revised incorporating the Organoleptic properties not just % FFA.2. The word preliminary was omitted in the title. The word quantitative was also removed.3. Conclusion was adjusted to reflect on the title of the study.
Minor REVISION comments	<ol style="list-style-type: none">1. if you have L, a, b scale color test results using a refractometer, it would be better if they were displayed to strengthen color analysis.	<ol style="list-style-type: none">1. The researcher used in the study is only thru direct inspection so unfortunately no refractometric results will be added.
Optional/General comments	-	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
